

Computer Engineering Department, S V N I T, Surat.
Mid-Semester Examinations, March 2019
B Tech IV (CO) – 8th semester
Course: (CO-428) Cloud Computing (EIS-II)

Date: 11th March 2019

Time: 16:00 to 17:30

Marks: 30

Instructions:

1. Write your B Tech Admission No/Roll No. and other details clearly on the answer books and write your B.Tech Admission No. on the question paper too.
2. Assume any necessary data but give proper justifications.
3. Be precise and clear in answering the questions.

Q1. Answer the following.(Any Four) [20]

1. Enlist essential characteristics of cloud computing. How these characteristics are reflected in real time application. Explain each in details.
2. What is the main design goal of cloud computing architecture? Explain each and every in detail.
3. Organization of 500 employers is working on offline mode. They want to switch their entire work on digital platform. What are the requirements to make their move successful? Also justify modules required for their plan.
4. What is the difference between VMware and Xen-server on the basis of type, provider, requirements, task, etc.
5. In terms of system performance utilization which type of virtualization is beneficial? Justify.

Q2. Answer the following. [10]

1. What are the characteristics on which a Cloud computing model should be selected for implementing and managing workload to meet business demands? Give example. 3
2. How does Cloud computing change the relationship between provider and consumer? If I have a service model which provides virtualized computing resources over the internet. What are the requirements suitable with respect to this cloud deliver model? 3
3. Demonstrate Cloud file system which supports large-scale processing workloads on commodity hardware designed to tolerate frequent failures, read and write operations. 4
